Out of 26 reviews, original articles, or case reports published in Journal of Neurosonology and Neuroimaging from two issues in 2019, 1 review article lacked the description of informed consent, in which identifiable photos were present. Also, 1 original article lacked the description of institutional review board number. Regarding the former article, however the editorial office confirmed that the corresponding author of the review article had already received the informed consent before submitting the manuscript. Therefore, editorial office apologizes readers not checking those ethical issues and publishes Addendum as follows:
